

MICROCURRENT FACE LIFT

Microcurrent facials revitalize and rejuvenate the skin so incredibly, they have earned the nickname, the *non-surgical Facelift*. The Microcurrent Face Lift sculpts, tightens, tones, firms and lifts the neck, jaw, and eye areas. Microcurrent mirrors the body's own electrical current. The low level electrical impulses trigger regenerative chemical reactions at a cellular level to improve skin health and comfortably stimulate facial nerve and muscle fibers to promote visibly younger looking skin. In addition to lifting and tightening, it reduces the appearance of fine lines and wrinkles, puffiness, improves facial circulation, lymph drainage and product penetration. Clinical trials have proved that the Microcurrent Face Lift can increase the skin's natural production of collagen by 14%, elastin by 48%, blood circulation by 38% and cellular ATP by 500% in 21 days. The effects are cumulative. An average of 10-12 consecutive treatments should be performed 2-7 days apart for the best results. A follow-up treatment is recommended every 4-6 weeks to maintain your rejuvenated muscle memory.

LED PHOTO-REJUVENATION

633 nm Red Light

Anti-aging, *fountain of youth*, enhances the results of all VL skin care treatments! Collagen and elastin are essential for firm, tight, smooth skin. Even a surgical facelift can't stop the aging process; cellular metabolism slows with aging. But 633nm Red Light energizes the fibroblasts in skin cells to stimulate collagen production, fade sunspots and hyper-pigmentation and accelerate wound healing. Relaxing and uplifting 20 min stand alone treatment series or as an add-on after any facial to increase product penetration and absorption.

Blue & Red Light Therapy

This 15 minute treatment is ideal for acne and rosacea. Blue light kills deep bacteria and speeds healing.
